This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons

- I 1 Claims Nos
because they relate to subject matter not required to be searched by this Authority, namely
- 2 r Claims Nos
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically
- 3 r~ Claims Nos
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6 4(a)

Box No. ID Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows

The inventions of claims 1,4-5,11 and the inventions of claims 2-3,6-10 are linked to be one another only in respect of the feature "etching the semiconductor film using the mask to form a semiconductor layer". However, this feature is disclosed in a prior art document JP 2000-066233 A (HITACHI, LTD), 2000.03.03. So the feature cannot be a special technical feature.

Therefore there are no technical relationship which is considered as "special technical feature" (PCT rule 13.2) among the claims 1,4-5,11 and the claims 2-3,6-10. So this application contains the following groups of invention which are not so linked as to form a single inventive concept under PCT rule 13.2.

Group I: Claims 1,4-5,11

Group II: Claims 2-3,6-10
